## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the back panel having a line of perforations at or adjacent the fold line between the sealing flap and front panel (claims 2 and 12) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 11, 12, 13 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Will.

Will discloses an envelope comprising a front panel and back panel, a sealing flap 1 hingedly connected the front panel by fold line 12, a corner section 8 having a legend, a strip of adhesive sealing material 2 extending along the sealing flap (but not in the area of the corner section), a line of perforations 11 extending from an outer free edge of the sealing flap to and along the fold line.

Regarding the recitation "whereby...said envelope easily can be opened by pulling on an edge of said corner section of said sealing flap having said legend or indicia to create an opening in said envelope where a finger or tool can be inserted to open said envelope along said fold line", it has been held that the functional "whereby" statement does not define any structure and accordingly can not serve to distinguish. *In re Mason*, 114 USPQ 127, 44 CCPA 937 (1957). Furthermore, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 1-3, 11-13, 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Snider and Sung et al.

Snider discloses the claimed device except for the corner section having the legend "OPEN HERE". Sung et al. discloses that it is known in the art to provide the legend "OPEN HERE" on an analogous openable section of a sealing flap. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the corner section of Snider with the legend "OPEN HERE" of Sung et al., in order to provide the recipient of the envelope with a visual indication how the envelope is to be opened.

6. Claims 1, 3, 11, 13, 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Connor (Canadian Patent No. 636,634).

O'Connor discloses the claimed invention except for the legend 27 being located on the corner section 17. It would have been obvious to one having ordinary skill in the art at the time the invention was made to place the legend of O'Connor on the corner section, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

***Allowable Subject Matter***

7. Claims 4-10 are allowed.
8. Claims 14-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
